Response to Amendment

Applicant's amendment dated 08/06/2002 has been received and entered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 17-30 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: claims 17 and 18 fails to state the relationship of two electrode layers and how two electrode layers can be cooperated to each other.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1-4, 6-7, 9 and 13-16 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Leupp et al., US Patent No. 3,863,332, as stated in the previous office action.

Regarding claims 1 and 2, in response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a second layer of the at least one electrode formed in contact with the first electrode

Art Unit: 2871

layer (claim 1) or a second layer of the at least one electrode (claim 2)) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). In particular, regarding claim 1, Leupp et al. do disclose an aluminum layer (e.g., spacer 33) formed on a portion the first electrode layer (19) as shown in figure 10. Likewise, regarding claim 2, Leupp et al. do disclose a second layer (e.g., layer 25) formed in contact with the first electrode layer (19).

Accordingly, the rejection of the above claims stand.

Allowable Subject Matter

5. Claims 5, 8, 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 17-30 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: .

The references of record neither disclose nor make obvious an electrode structure and a method of improving a conductivity of a transparent electrode structure in an electro-optical device comprising a first transparent electrode layer, a second electrode layer having a higher

Art Unit: 2871

conductivity than the first electrode layer and being electrically coupled to the first transparent electrode layer as set forth in claims 17-18.

Conclusion

8. Applicant's arguments filed 08/06/2002 have been fully considered but they are not persuasive as stated above .

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lee (US 5,838,414) disclose an LCD device having a polyamide spacers.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
